SUMMARY

Data Science and Integrative Biology senior at UC Berkeley targeting product data scientist and data analyst roles. Experience turning ambiguous questions into measured answers: replaced an unverified benchmark with a multi-trial measurement design, and ran survey-based quantitative research that shaped shipped product decisions. Python, SQL, statistics, and communicating findings to non-technical stakeholders.

EDUCATION

University of California, Berkeley Expected May 2027
B.A. Data Science (Concentration: Computational Methods in Biology) and B.A. Integrative Biology *Berkeley, CA*
Coursework: Probability for Data Science (Data C140), Principles & Techniques of Data Science (Data 100), Optimization Modeling (IEOR 164), Data Structures, Ethics of Data; **in progress:** Machine Learning (CS 189), Data Engineering (DS C101)

SKILLS

Languages & Tools: Python (pandas, NumPy, scikit-learn), SQL, R, PostgreSQL, Jupyter, Git, Figma
Statistics & Methods: probability, hypothesis testing, regression, exploratory data analysis (EDA), survey design, cohort segmentation, precision-recall tradeoffs, linear programming, model evaluation
Communication: data visualization, stakeholder reporting, technical documentation, bilingual Korean and English
Spoken: Korean (native), English (fluent), Mandarin

EXPERIENCE

SmartMind AI May 2026 - Aug 2026
AI Researcher, Data Science Team *Seoul, Republic of Korea*
- Replaced single-run pass/fail testing with a 43-run measurement design (15 scenarios, 3 trials each), converting an unverified 20/20 result into a measured 13/15 with observable run-to-run variance
- Corrected 2 errors in the client's own reference answers by reconciling live query output against source financial statements, and traced a 40% discrepancy in a financial ratio to one inconsistent join pattern
- Documented the business logic the analysis depended on (debit/credit balancing, fiscal-period joins, composite keys) by extracting undocumented rules from the client data team

Asan Medical Center (AMC) May 2025 - Aug 2025
AI Research Intern *Seoul, Republic of Korea*
- Analyzed high-dimensional clinical datasets in Python and Jupyter, identifying the data patterns that informed feature selection and a team strategy placing 7th among multi-institutional teams
- Applied interpretability techniques (SHAP, Grad-CAM) to validate model outputs and communicate feature importance to clinicians without a technical background

Berkeley Consulting Collaborative - Braven Jan 2025 - May 2025
Data & UX Consultant *Berkeley, CA*
- Cleaned and visualized survey responses across an 8-person team using bar charts, histograms, and heatmaps, surfacing majority patterns, outliers, and inconsistencies in attendance, device, and content-preference distributions
- Segmented the dataset by class year and re-ran the analysis per cohort when the aggregate profile proved too coarse, producing four distinct data-driven personas that drove mobile app iterations

PROJECTS

- **Heart Disease Predictor:** built an end-to-end classification pipeline on the UCI Cleveland dataset reaching 87.3% accuracy, deliberately prioritizing recall over precision to reduce missed diagnoses of at-risk patients
- **Spam Classifier:** performed exploratory data analysis and feature engineering on 8,000+ SpamAssassin examples, optimizing the precision-recall tradeoff to minimize false positives
- **Geospatial Route Optimizer:** computed pairwise distances across 200+ real-world coordinates and applied depth-first search with branch-and-bound pruning to identify globally optimal traversal paths
- **AI Tactical Assistant:** trained a PyTorch model to predict match outcomes from historical player and team data, paired with a PuLP linear-programming optimizer generating constrained optimal formations

LEADERSHIP & AWARDS

US Army, 8th Army 2ID HHBN Sep 2022 - Mar 2024
Non-Commissioned Officer *Republic of Korea*
- Led a 40+ soldier platoon as a bilingual Korean-English platoon leader, delivering Army Combat Fitness Test (ACFT) training and coursework to a 96% platoon pass rate
- Awarded the US Army Certificate of Achievement (Mar 2024) for leadership and bilingual communication
