SUMMARY

Product designer and design technologist seeking user experience (UX) and product design roles. Across three consulting engagements, took work from user research through wireframes to production-ready screens, then built the interface in Figma, React, and SwiftUI.

EDUCATION

University of California, Berkeley Expected May 2027
B.A. Data Science and B.A. Integrative Biology *Berkeley, CA*
Berkeley Certificate in Design Innovation, Jacobs Institute - in progress, expected May 2027
Coursework: Discovering Design (DESINV 10), Principles & Techniques of Data Science, Machine Learning (CS 189, in progress)

SKILLS

Design: Figma, FigJam, user experience (UX) research, survey design, affinity mapping, competitive benchmarking, personas, wireframing, prototyping, usability testing, design systems
Build: React, Vite, HTML, CSS, JavaScript, Three.js, Swift, SwiftUI, Rhino 3D, Photoshop, Git
Data: Python, SQL, pandas, quantitative user research, data visualization, A/B-style survey analysis
Spoken: Korean (native), English (fluent), Mandarin

RELEVANT EXPERIENCE

Invention Corps of Berkeley - Urban Conga Jan 2026 - Jun 2026
UX Design Consultant *Berkeley, CA*
- Led concept development for an interactive public installation with a 9-consultant team, segmenting behavioral survey data into three space archetypes and designing a distinct installation direction for each
- Translated qualitative interaction goals (dwell time, cluster size, voluntary engagement) into concrete interaction mechanics and low-cost sensing buildable in a real public space
- Modeled candidate installation footprints in Rhino 3D, validating each spatial layout against real budget and footprint constraints

Invention Corps of Berkeley - Mozilla Firefox Aug 2025 - Feb 2026
Design Engineer Consultant *Berkeley, CA*
- Structured a five-theme survey instrument from a 12-person FigJam brainstorm, pressure-tested against eight criteria including clarity, flow, scalability, and ethics
- Identified real-time resource visibility as the gap in existing browser eco-modes, designed the interface in Figma, and built it as a React and Vite extension tracking, filtering, and sorting 50+ concurrent tabs by memory and CPU usage

Berkeley Consulting Collaborative - Braven Jan 2025 - May 2025
UI/UX Consultant *Berkeley, CA*
- Surveyed students across public four-year universities on virtual career events, led affinity mapping with 8 consultants, then re-ran it per class year to produce four cohort personas once the aggregate profile proved too coarse to drive design
- Translated the personas into low-fidelity wireframes to validate information architecture, then applied Braven brand typography and color to deliver 6 production-ready screens in Figma, from welcome dashboard and speaker library to a personalized career roadmap

PROJECTS

- **Personal Portfolio Site:** designed and built end-to-end in HTML, CSS, JavaScript, and Three.js: scroll-driven animation, a cursor-tilt carousel, an interactive 3D room tour, and Korean/English localization
- **Todo-Widget (iOS):** built a native Swift and SwiftUI home-screen widget using WidgetKit that surfaces task progress at a glance, with a companion note-taking app (NotesLab) in progress
- **Multi-Agent Ad Generation System:** generates on-brand ads from audience data; designed the layered ad-spec contract and a Figma plugin that rebuilds each ad as editable Figma layers, not a flat image

ADDITIONAL EXPERIENCE

SmartMind AI - AI Researcher, Data Science Team May 2026 - Aug 2026
Led a large language model (LLM) evaluation proof-of-concept on a live enterprise system; built a 43-run reproducibility framework.

Asan Medical Center - AI Research Intern May 2025 - Aug 2025
Built 3D medical imaging pipelines; applied SHAP and Grad-CAM to make model decisions legible to clinicians.

US 8th Army, 2ID HHBN - Non-Commissioned Officer Sep 2022 - Mar 2024
Led a bilingual 40-soldier platoon to a 96% fitness-test pass rate; US Army Certificate of Achievement.
