SUMMARY

Design engineer who designs the interface and then builds it. Built a React and Vite browser extension from my own user research, a Figma plugin that reconstructs generated designs as editable layers, a native SwiftUI home-screen widget, and a Three.js portfolio site, with two AI research internships behind the technical depth. UC Berkeley senior seeking UX engineer, design engineer, and design technologist roles.

EDUCATION

University of California, Berkeley Expected May 2027
B.A. Data Science and B.A. Integrative Biology *Berkeley, CA*
Berkeley Certificate in Design Innovation, Jacobs Institute - in progress, expected May 2027. **Coursework:** Discovering Design (DESINV 10), Data Structures (CS 61B), Machine Learning (CS 189, in progress)

SKILLS

Front End: React, Vite, JavaScript, HTML, CSS, Three.js, browser extension APIs, responsive layout, scroll-driven animation, Swift, SwiftUI, WidgetKit
Design: Figma (including the Plugin API), FigJam, design systems, wireframing, prototyping, interaction design, user experience (UX) research, survey design, usability testing, Rhino 3D
Engineering: Python, SQL, Git, PyTorch, large language model (LLM) pipelines, Neo4j, PostgreSQL, Photoshop
Spoken: Korean (native), English (fluent), Mandarin

SELECTED WORK

- **Personal Portfolio Site** (HTML, CSS, JavaScript, Three.js): designed and built end-to-end with scroll-driven animation, a cursor-tilt carousel, an interactive 3D room tour, and a site-wide Korean/English localization layer, responsive across breakpoints with no framework
- **Multi-Agent Ad Generation System, Figma Handoff Plugin** (Figma Plugin API, JavaScript, Python): designed the layered spec that 8 large language model agents read and write, then determined Figma REST cannot write design content and built on the Plugin API to map that spec onto Figma nodes, so AI-generated designs arrive as editable text, image, and shape layers instead of a flattened export
- **Todo-Widget** (Swift, SwiftUI, WidgetKit): built a native iOS home-screen widget that surfaces task progress at a glance without opening the app, with a companion note-taking app (NotesLab) in progress

EXPERIENCE

Invention Corps of Berkeley - Urban Conga Jan 2026 - Jun 2026
UX Design Consultant *Berkeley, CA*
- Translated behavioral research into quantifiable sensing schemas with a 9-consultant team and modeled candidate installation footprints in Rhino 3D, validating each layout against real budget and footprint constraints

Invention Corps of Berkeley - Mozilla Firefox Aug 2025 - Feb 2026
Design Engineer Consultant *Berkeley, CA*
- Identified real-time resource visibility as the gap in existing browser eco-modes through survey research with a 12-person team, designed the interface in Figma, and built the React and Vite extension that tracks, filters, and sorts 50+ concurrent tabs by live memory and CPU usage

Berkeley Consulting Collaborative - Braven Jan 2025 - May 2025
UI/UX Consultant *Berkeley, CA*
- Turned survey research and four cohort personas into low-fidelity wireframes to validate information architecture with the client, then delivered 6 production-ready mobile screens in Figma on Braven brand language, from welcome dashboard and speaker library to a personalized career roadmap

ADDITIONAL EXPERIENCE

SmartMind AI - AI Researcher, Data Science Team May 2026 - Aug 2026
Led a large language model evaluation proof-of-concept on a live enterprise system; built a 43-run reproducibility framework.

Asan Medical Center - AI Research Intern May 2025 - Aug 2025
Co-authored a paper on a multimodal deep survival model; applied SHAP and Grad-CAM to make model decisions legible to clinicians.

US 8th Army, 2ID HHBN - Non-Commissioned Officer Sep 2022 - Mar 2024
Led a bilingual 40-soldier platoon to a 96% fitness-test pass rate; US Army Certificate of Achievement.
