EDUCATION

University of California, Berkeley Expected May 2027
B.A. Data Science and B.A. Integrative Biology *Berkeley, CA*
Berkeley Certificate in Design Innovation, Jacobs Institute for Design Innovation — in progress, expected May 2027
Coursework: Discovering Design (DESINV 10), Principles & Techniques of Data Science (Data 100), Ethics of Data (Data C104); **in progress:** Machine Learning (CS 189), Data Engineering (DS C101)

SKILLS

Design: Figma, FigJam, user research & survey design, affinity mapping, benchmarking, personas, wireframing, prototyping, design systems
Build: React, Vite, HTML/CSS/JavaScript, Three.js, SwiftUI, Rhino 3D, Photoshop
Data: Python, SQL, pandas, quantitative user analysis
Spoken: Korean (native), English (fluent), Mandarin

DESIGN EXPERIENCE

Invention Corps of Berkeley — Urban Conga Jan 2026 – Jun 2026
UX Design Consultant *Berkeley, CA*
- Ran a public-space behavioral survey with a 9-consultant team, segmenting responses into three space archetypes — civic, park, and commercial — each with distinct dwell-time, group-size, and value signatures
- Translated qualitative goals (dwell time, cluster size, voluntary engagement) into quantifiable data schemas achievable with low-cost sensing: capacitive touch, IR proximity, and pressure switches
- Modeled candidate installation footprints in Rhino 3D, validating each layout against its sensing data flows and the budget and footprint constraints of a real public space

Invention Corps of Berkeley — Mozilla Firefox Aug 2025 – Feb 2026
Design Engineer Consultant *Berkeley, CA*
- Structured a five-theme survey instrument from a 12-person FigJam brainstorm, pressure-testing it against eight criteria — clarity, flow, scalability, length, and ethics among them — before distribution
- Identified real-time resource visibility as the gap in existing browser eco-modes, and designed the resulting interface in Figma with the team split across frontend and backend tracks
- Shipped the extension in React and Vite: live tracking, filtering, and sorting of 50+ concurrent tabs by memory and CPU usage

Berkeley Consulting Collaborative — Braven Jan 2025 – May 2025
UI/UX Consultant *Berkeley, CA*
- Designed and distributed a user survey across public four-year universities, sampling class year, demographics, and device usage to capture friction before, during, and after virtual career events
- Led affinity mapping with 8 consultants across three themes, then re-ran the exercise per class year to produce four distinct cohort personas once the general profile proved too coarse to drive design — then translated those personas into mobile app design iterations that measurably increased engagement and usability

SELECTED PROJECTS

- **Personal Portfolio Site:** designed and built end-to-end in vanilla HTML/CSS/JS with Three.js — scroll-driven animation, a cursor-tilt carousel, an interactive 3D room tour, and full Korean/English localization
- **NotesLab & Todo-Widget (iOS):** shipped two native Swift/SwiftUI apps — a note-taking app with local storage, and a home-screen WidgetKit widget for at-a-glance task progress
- **Project AD:** multi-agent system generating on-brand advertising from audience data, with a design-language spec schema, automated brand QC gates, and a Figma handoff plugin

ADDITIONAL EXPERIENCE

SmartMind AI — AI Researcher, Data Science Team May 2026 – Aug 2026
Led an LLM evaluation proof-of-concept on a live enterprise ERP system; built a 43-run reproducibility framework.

Asan Medical Center — AI Research Intern May 2025 – Aug 2025
Built 3D medical imaging pipelines; applied SHAP and Grad-CAM to make model decisions legible to clinicians.

US 8th Army, 2ID HHBN — Non-Commissioned Officer Sep 2022 – Mar 2024
Led a bilingual 40-soldier platoon to a 96% ACFT pass rate; awarded the US Army Certificate of Achievement.
